SCREEN SHOTS:

The screenshot shows a Windows 10 desktop with two main applications open: Visual Studio Code and a web browser (Chrome).

Visual Studio Code: The editor is open to a file named `phone.py` in the `phone.py` project. The code is a Python script that takes a phone number as input and outputs its details. The script includes comments and a docstring. The output of the script is displayed in the console window at the bottom of the editor.
